

Thomas Wright, MD, Featured Speaker – FDRS National Conference, April 2016, St. Louis, MO

St. Louis, MO (PRWEB) April 12, 2016 - Dr. Thomas Wright, Board Certified physician and specialist in Venous & Lymphatic Medicine at the Laser Lipo and Vein Center, was a featured speaker on Lipedema Disease at the Fat Disorders Research Society Conference – April 8th – 9th at the St. Louis Marriot Hotel

“ Dr. Wright understands the painful disease lipidema and is creating the awareness that there is hope!”

Lipedema is a chronic, painful fat syndrome disease that occurs mostly in the female population. It can often be misdiagnosed as simple obesity. But, this abnormal accumulation of fat can often be debilitating and affect a person's mobility. Lipedema mostly affects the legs, but it can also be in the arms as well. If left untreated, it can also lead to other serious medical conditions. Lipedema is not a rare, it affects up to 11% of the female population. However, it is so rarely appreciated that most women with this fat disorder do not know they have it.

Fat Disorders Research Society is a not for profit organization dedicated to improving the quality of life for all people affected by adipose tissue disorders. FDRS annual congress gathers medical experts from around the world that specialize in fat disorders, which are either rare or do not receive proper recognition.

Dr. Wright understands this painful disease and is creating the awareness that there is hope! He is one of very few vein specialists to be able to diagnosis Lipedema and effectively treat the disease with a range of conservative treatments and state of the art lymph sparing and water assisted liposuction techniques.

For more information about this disease, the conference, or if you would like an interview with Dr. Wright, please visit fatdisorders.org, or contact Dr Wright at <http://www.laserlipoandveins.com> or call 636 614 1665.
